

OCEANS 2023 CAREER FAIR

1:30 to 3 p.m., Wednesday, September 27

Mississippi Coast Convention Center Exhibit Hall

The [OCEANS 2023 Gulf Coast Conference and Exposition](#) is for global maritime professionals to learn, innovate and lead in the protection and utilization of the world's largest natural resource – our OCEANS.

The University of Southern Mississippi's Mississippi Defense Initiative is sponsoring a Career Fair at the conference. Students, young professionals, those looking for their next position, military personnel transitioning to the workplace, veterans, and current National Guard and Reserve members are encouraged to use this opportunity to find your perfect career. **Deadline: Sept. 22.**

HOW TO PARTICIPATE

1. Use this link to [REGISTER FOR ADMISSION](#) to the Conference. A free “Exhibit Hall Only” option is available.
2. Use this link to [RESERVE YOUR MEETINGS](#) with up to 6 of the hiring vendors below:

PARTICIPATING ORGANIZATIONS:

Bollinger Shipyards | bollingerjobs.com

Bollinger Mississippi Shipbuilding is looking to fill the following positions: Industrial Engineer, Master Scheduler, Engineering Lead (Electrical), Engineering Lead (Mechanical), Mechanical Engineer, Planner (Structural), Scheduler and Boat Coordinator. For details and to apply for these and all open positions please go to www.bollingerjobs.com.

David Evans and Associates, Inc. | deainc.com/what-we-do/marine-services

David Evans and Associates, Inc. (DEA) Marine Services Division is looking for Hydrographic Project Managers to support our Gulfport, MS, and Tustin, CA, offices. Our Hydrographic Project Managers actively participate in business development, client interaction, managing project execution, scope, and budget; estimating projects; coordinating, managing, and conducting field operations; overseeing and assisting with data processing efforts; managing risk to crew and equipment; QA/QC; keeping abreast with changing technology; strategic planning; and maintaining good relations with clients and staff. The scope would cover a wide range of hydrographic and marine geophysical services with a primary focus on multibeam bathymetric surveys. Additional duties would include guidance, leadership, coaching, and mentoring to the Marine Services staff.

DimEye Corporation | dimeye.com

DimEye Corp. is looking for a technical/commercial engineer to sell the ORPHIE camera and provide technical support and a surveyor to go offshore and process data at the office/home with our Video Laser Scan photogrammetry software.

GeoSpectrum Technologies Inc. | geospectrum.ca

GeoSpectrum is looking for talented individuals with a passion for ocean technology. With departments ranging from mechanical and electrical engineering, software, business development, and a wide range of manufacturing positions, we have career paths for everyone. We provide on-the-job training and encourage anyone to apply regardless of their education and technical backgrounds.

Integrated Systems Solutions | issmgt.com

ISS looks for passionate people who are reliable, have integrity, and are committed to their clients' missions. Our teams are made up of highly performing individuals in the areas of program and project management, engineering, science, policy, operations, and communications - all of whom work together to accomplish the agency's mission. Come meet their leadership to see how you can help change the world!

Jaia Robotics | jaia.tech

Jaia Robotics welcomes enquiries from engineering rockstars in all disciplines that have a passion for aquatic robotics, ocean engineering and environmental concerns.

Kongsberg Discovery | kongsberg.com/careers

Field Service Engineers needed in Washington State! To apply, visit their website kongsberg.com/careers.

Leidos | leidos.com

Leidos is hiring:

- Electrical/Computer Engineers
- Mechanical Engineers
- Electronic/Mechanical Technicians

All available positions can be found online at leidos.com/careers.

National Geospatial-Intelligence Agency (NGA) | nga.mil

Is looking for bathymetrists. Bathymetrists receive, analyze, and deconflict U.S. and foreign bathymetric data for use by the Intelligence Community (IC) and external customers. They populate and maintain data and metadata in the bathymetry database, ensuring the accuracy of metadata pertaining to collection source platforms and depth recording devices. They also provide customers with conflated and corrected mission-specific data.

Naval Meteorology and Oceanography | metoc.navy.mil

"From the Bottom of the Ocean to the Stars; It Starts With Us!" Naval Meteorology and Oceanography Command directs and oversees more than 2,500 globally-distributed civilian and uniformed personnel who collect, process and exploit environmental information to assist Fleet and Joint Commanders in all warfare areas to make better decisions faster than the adversary. With a high-talented and trained civilian force, we are the Department of Defense's authoritative source for characterization, and applying data, of the physical-battlespace for warfighting advantages.

Civilian positions include scientific (ex: meteorology, earth, atmospheric, oceanography, marine, astronomy, geophysics, hydrography, etc.) engineering and technical positions as well as IT, business, finance, human resources and other administrative positions.

Naval Research Laboratory | nrl.navy.mil

The NRL Stennis Space Center field site focuses on all aspects of ocean and geospatial sciences. Temporary and permanent employment options are offered at the undergraduate, graduate and post-doctoral levels, in addition to sabbaticals and summer faculty options. NRL is particularly interested in earth and computer sciences and complementary sciences.

Nereid Biomaterials | nereidbio.org

Nereid Biomaterials makes ocean-degradable polymers for marine applications. We are a team of materials scientists, synthetic biologists, engineers and oceanographers innovating sustainable materials and designs for a healthier ocean.

Nortek | nortekgroup.com

Potential opportunities for students or more experienced professionals in oceanographic and subsea navigation technology. Nortek makes ADCPs (current measurement tools) and DVLs (subsea vehicle navigation aids). Salespeople act as trusted advisers to our customers and applications engineers support users globally. Nortek is a small team in the US, but has a closely connected global presence.

Sea Centric Inc. | seacentric.ca

Crew members for multiple research boats that can operate internationally but operate out of St. John's, NL. Marine cooks, Chief Mates and Captains with DP are highly sought but will take applications for all positions on the vessels.

Seemann Composites LLC | seemanncomposites.com

Seeman Composites LLC is hiring:

- Hiring - Composite Manufacturing Engineer
- Project Engineer
- Senior Project Engineer
- Quality Engineer

All current openings can always be found seemanncomposites.com/careers/.
